

Wildlife Fragment Observations Worksheet

NAME: _____

Use this sheet to take notes on one group of native plants you find and all of the animals you observe visiting them. For each additional group of plants in another location, use a new copy of this sheet.

Required Information

LOCATION (street address):

(if you don't know an address, write a nearby landmark to help find the area on a city map)

LOCATION TYPE:

--

(park? garden? street? etc.)

PLANT SPECIES

# found	Plant Species Name

(find at least one plant species. more is optional)

POLLINATOR COUNTS:

Date:	Start Time	End Time	<i>butterflies & moths</i>	<i>bees & wasps</i>	<i>ants</i>	<i>beetles</i>	<i>flies</i>	<i>grasshoppers & crickets</i>	<i>birds</i>	<i>other</i>

total time should be at least 15 minutes

for each animal, record the maximum seen at one moment. do not tally visitors or you will double-count individuals.

Optional Information

Other notes and observations:

what nearby plant, animal, and human factors might affect this area? how many flowers are open?
take any additional notes that you want to remember for when you get home to enter data on the map.
